

Air Curtains

Create an effective environmental barrier that saves energy.

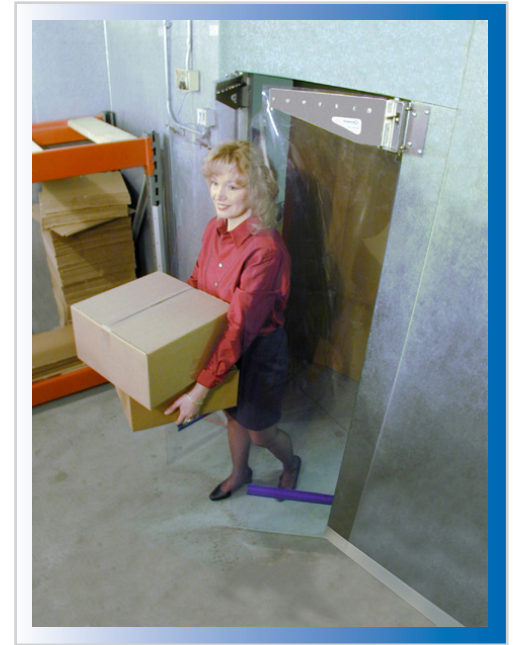

- Improves working environments and productivity
- Creates energy savings, by keeping heated/cooled air inside the building
- Increases safety, with easy access through openings
- Quick return on investment. The average Berner air curtain pays for itself in less than two years

Available with or without heat (electric, steam, hot water or gas fired)

Flexible Swinging Doors

Create fast & easy access for walk-in coolers/freezers.

Mounting hardware is non-corrosive with speed adjustments

Strip Doors

Create an affordable environmental barrier.

Stock or custom sizes. Bulk rolls and mounting hardware available.

- Loading Dock Doors
- Machine Enclosure, Conveyor Openings and Welding Screens
- Cold Storage Doors
- Insect Control
- High Traffic Doors

Specialty Door Heaters

Low cost alternative to heating open doorways.

Standalone or together with a Berner Air Curtain to create a thermal barrier and comfortable working environment.

Note: Designed for heating open doors only; not to be used for general-purpose, spot or area heating. Consult factory for special applications.
