

SPG Cantilever Shelving

This freestanding cantilevered shelving system does not have front uprights, which allows easy access to items and increases storage capacity in the existing footprint by up to 30%.

SPG Freestyle Cantilever Shelving Offers:

- Durable heavy-duty steel construction
- Shelving available in five widths and eight lengths; uprights available in five heights
- Adjustable shelves on two-inch increments for maximum flexibility — no tools required for adjustment
- Add-on units provide options for expanding side-to-side using common uprights with dual side adjustment
- Total load-bearing capacity of 3,200 lbs.
- Freestyle Brace™ significantly increases load capacities: 25% on 30-inch shelves — from 600 lbs. to 800 lbs. and 40% on 24-inch shelves — to 1,000 lbs.
- Shelves, uprights, and frame kits have a durable gray epoxy-based finish with advanced antimicrobial protective agent
- Complete assortment of accessories including hanger rails and shelf covers in wire and stainless steel
